RAK INSURANCE

Ras Al Khaimah National Insurance Company PSC
Board of Directors' Report

Introduction

The Board of Directors has pleasure in submitting their report and the audited Financial Statements for the year ended 31 December 2016.

Incorporation and registered office

Ras Al Khaimah National Insurance Company PSC (RAK Insurance) was incorporated under an Emiri Decree Number 20/76 issued by HH Ruler of Ras Al Khaimah. The address of the registered office is PO Box 506, Ras Al Khaimah, United Arab Emirates.

Financial position and results

Ras Al Khaimah National Insurance Co. (RAK Insurance), achieved a net profit for of AED 23.4M compared to 23.1M in the previous year, an increase of 1.3%.

Gross written premium increased by 3.6% to AED 422M compared to AED 407.5M in the previous year.

Underwriting profit from insurance operations decreased to AED 24.6M compared to AED 42.4M in the previous year, a decrease of 42% which was compensated by an increase in investment and other income of AED 18.1M compared to a loss of 7.4M in the previous year.

The Company's total assets increased from AED 657.4M to AED 709.4M, an increase of 7.9% compared to the previous year and the Shareholders' Equity increased from AED 233.4M to AED 234.8M.

Total liabilities were AED 474.6 M and compared to AED424M in the previous year. This increase was primarily due to increased insurance contract liabilities and other insurance payable resulting from the growth in our "book of business" during the year.

Basic earnings per share remain stable at AED 0.21 on a Capital base of AED 110 M.

On behalf of the Board of Directors of RAK Insurance, I would like to thank all who have contributed to our Company's success. Our sincere appreciation to the executive management and staff for their dedication, commitment and constant hard work. The Directors would also like to acknowledge our reinsurance partners, customers and all the stakeholders of the company.

Yours faithfully,

SALEM AL SHARHAN
Chairman

Deloitte.

INDEPENDENT AUDITOR'S REPORT

The Shareholders of
Ras Al Khaimah National Insurance Company P.S.C.
Ras Al Khaimah
United Arab Emirates

Report on the audit of the financial statements

Opinion

We have audited the financial statements of **Ras Al Khaimah National Insurance Company P.S.C. (the "Company"), Ras Al Khaimah, United Arab Emirates** which comprise the statement of financial position as at 31 December 2016, and the statement of income, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of **Ras Al Khaimah National Insurance Company P.S.C., Ras Al Khaimah, United Arab Emirates**, as at 31 December 2016, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the other ethical requirements that are relevant to our audit of Company's financial statements in United Arab Emirates, and we have fulfilled our other ethical responsibilities. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Anis Sadek (521), Cynthia Corby (995) Georges Najem (809), Mohammad Khamees Al Tah (717), Musa Ramahi (872), Mutasem Dajani (726), Rama Padmanabha Acharya (701) and Samir Madbak (386) are registered practicing auditors with the UAE Ministry of Economy.

INDEPENDENT AUDITOR'S REPORT (continued)

Key audit matters (continued)

Key audit matter	How our audit addressed the key audit matter
Valuation of insurance contract liabilities As at 31 December 2016, insurance contract liabilities amounted to AED 339 million, as detailed in note 10 to these financial statements. As set out in note 3 and 4, valuation of these liabilities requires professional judgment and also involve number of assumptions made by management. This is particularly the case for those liabilities that are based on the best-estimate of technical reserves that includes ultimate cost of all claims incurred but not settled at a given date, whether reported or not, together with the related claims handling costs and related technical reserves. A range of methods are used by management and the internal actuary/independent external actuary to determine these provisions. Underlying these methods are a number of explicit or implicit assumptions relating to the expected settlement amount and settlement patterns of claims. Changes in these assumptions can result in material impacts to the valuation of these liabilities. The valuation of these liabilities also depends on accurate data about the volume, amount and pattern of current and historical claims since they are often used to form expectations about future claims. As a result of all of the above factors, insurance contract liabilities represent a high risk for the Company.	Our audit procedures included: • Testing the underlying Company data to source documentation. • Evaluating and testing the claims handling and case reserve setting processes of the Company. • Evaluating and testing of key controls designed to ensure the integrity of the data used in the actuarial reserving process. • Checking samples of claims case reserves through comparing the estimated amount of the case reserve to appropriate documentation, such as reports from loss adjusters, confirmations obtained from lawyers' etc. • Re-performing reconciliations between the claims data recorded in the Company's systems and the data used in the actuarial reserving calculations. • Recalculating the unearned premium portion and cross checking the same with Company's calculation. • Checking samples of unearned premium with appropriate documentation. In addition, with the assistance of our actuarial specialists, we: •performed necessary reviews to ascertain whether the results are appropriate for financial disclosure. •reviewed the actuarial report compiled by the independent external actuaries of the Company and calculations underlying these provisions, particularly the following areas; • Appropriateness of the calculation methods and approach (actuarial best practice) • Review of assumptions • Sensitivities to key assumptions • Risk profiles • Consistency between valuation periods • General application of financial and mathematical rules.

INDEPENDENT AUDITOR'S REPORT (continued)

Other information

The Board of Directors and management is responsible for the other information, which comprises the Directors' Report which we obtained prior to the date of this auditors' report and the remaining of the annual report is expected to be made available to us after that date. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the remaining information of the annual report of the Company, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of the Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and their preparation in compliance with the applicable provisions of the UAE Federal Law No. (2) of 2015, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

INDEPENDENT AUDITOR'S REPORT (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (continued)

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosure are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with Those Charged With Governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Those Charged With Governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with Those Charged With Governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law and regulations preclude public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other Legal and Regulatory Requirements

Further, as required by the UAE Federal Law No. (2) of 2015, we report that:

i) we have obtained all the information we considered necessary for the purposes of our audit;

ii) the financial statements have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Law No. (2) of 2015;

INDEPENDENT AUDITOR'S REPORT (continued)

Report on other Legal and Regulatory Requirements (continued)

iii) the Company has maintained proper books of account;

iv) the financial information included in the Directors' report is consistent with the books of account of the Company;

v) as disclosed in Note 8 to the financial statements, the Company has investment in securities as at 31 December 2016;

vi) Note 21 to the financial statements discloses material related party transactions and balances, and the terms under which they were conducted.

vii) based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Company has, during the financial year ended 31 December 2016, contravened any of the applicable provisions of the UAE Federal Law No. (2) of 2015, or its Articles of Association, which would materially affect its activities or its financial position as at 31 December 2016; and

viii) Note 19 to the financial statements discloses the social contributions made during the financial year ended 31 December 2016.

Further, as required by the U.A.E. Federal Law No. 6 of 2007 and the related Financial Regulations for Insurance Companies, we report that we have obtained all the information and explanations we considered necessary for the purpose of our audit.

Other Matter

The financial statements of the Company for the year ended 31 December 2015 were audited by another auditor, who expressed an unmodified opinion on those financial statements on 4 February 2016.

2. Application of new and revised International Financial Reporting Standards (IFRS)

2.1 New and revised IFRSs applied with no material effect on the financial statements

The following new and revised IFRSs, which became effective for annual periods beginning on or after 1 January 2016, have been adopted in these financial statements. The application of these revised IFRSs has not had any material impact on the amounts reported for the current and prior years but may affect the accounting for future transactions or arrangements.

- IFRS 14 *Regulatory Deferral Accounts*
- Amendments to IAS 1 *Presentation of Financial Statements* relating to Disclosure initiative.
- Amendments to IFRS 11 *Joint arrangements* relating to accounting for acquisitions of interests in joint operations.
- Amendments to IAS 16 *Property, Plant and Equipment* and IAS 38 *Intangible Assets* relating to clarification of acceptable methods of depreciation and amortization.
- Amendments to IAS 16 *Property, Plant and Equipment* and IAS 41 *Agriculture*: Bearer Plants.
- Amendments to IAS 27 *Separate Financial Statements* relating to accounting investments in subsidiaries, joint ventures and associates to be optionally accounted for using the equity method in separate financial statements.
- Amendments to IFRS 10 *Consolidated Financial Statements*, IFRS 12 *Disclosure of Interests in Other Entities* and IAS 28 *Investment in Associates and Joint Ventures* relating to applying the consolidation exception for investment entities.
- Annual Improvements to IFRSs 2012 – 2014 Cycle covering amendments to IFRS 5, IFRS 7, IAS 19 and IAS 34.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

2. Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.2 New and revised IFRS in issue but not yet effective

The Company has not yet applied the following new and revised IFRSs that have been issued but are not yet effective:

New and revised IFRSs	Effective for annual periods beginning on or after
Annual Improvements to IFRS Standards 2014 – 2016 Cycle amending IFRS 1, IFRS 12 and IAS 28	The amendments to IFRS 1 and IAS 28 are effective for annual periods beginning on or after 1 January 2018, the amendment to IFRS 12 for annual periods beginning on or after 1 January 2017
Amendments to IAS 12 *Income Taxes* relating to the recognition of deferred tax assets for unrealised losses	1 January 2017
Amendments to IAS 7 *Statement of Cash Flows* to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities.	1 January 2017
IFRIC 22 *Foreign Currency Transactions and Advance Consideration* The interpretation addresses foreign currency transactions or parts of transactions where: • there is consideration that is denominated or priced in a foreign currency; • the entity recognises a prepayment asset or a deferred income liability in respect of that consideration, in advance of the recognition of the related asset, expense or income; and the prepayment asset or deferred income liability is non-monetary.	1 January 2018
Amendments to IFRS 2 *Share Based Payment* regarding classification and measurement of share based payment transactions	1 January 2018
Amendments to IFRS 4 *Insurance Contracts*: Relating to the different effective dates of IFRS 9 and the forthcoming new insurance contracts standard.	1 January 2018
Amendments to IAS 40 *Investment Property*: Amends paragraph 57 to state that an entity shall transfer a property to, or from, investment property when, and only when, there is evidence of a change in use. A change of use occurs if property meets, or ceases to meet, the definition of investment property. A change in management's intentions for the use of a property by itself does not constitute evidence of a change in use. The paragraph has been amended to state that the list of examples therein is non-exhaustive.	1 January 2018

Notes to the financial statements
For the year ended 31 December 2016 (continued)

2. Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.2 New and revised IFRS in issue but not yet effective (continued)

New and revised IFRSs	Effective for annual periods beginning on or after
Amendments to IFRS 7 *Financial Instruments: Disclosures* relating to disclosures about the initial application of IFRS 9	When IFRS 9 is first applied
IFRS 7 *Financial Instruments: Disclosures* relating to the additional hedge accounting disclosures (and consequential amendments) resulting from the introduction of the hedge accounting chapter in IFRS 9	When IFRS 9 is first applied
IFRS 9 *Financial Instruments* (revised versions in 2009, 2010, 2013 and 2014)	1 January 2018

IFRS 9 issued in November 2009 introduced new requirements for the classification and measurement of financial assets. IFRS 9 was subsequently amended in October 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and in November 2013 to include the new requirements for general hedge accounting. Another revised version of IFRS 9 was issued in July 2014 mainly to include a) impairment requirements for financial assets and b) limited amendments to the classification and measurement requirements by introducing a 'fair value through other comprehensive income' (FVTOCI) measurement category for certain simple debt instruments.

A finalised version of IFRS 9 which contains accounting requirements for financial instruments, replacing IAS 39 *Financial Instruments: Recognition and Measurement*. The standard contains requirements in the following areas:

- **Classification and measurement**: Financial assets are classified by reference to the business model within which they are held and their contractual cash flow characteristics. The 2014 version of IFRS 9 introduces a 'fair value through other comprehensive income' category for certain debt instruments. Financial liabilities are classified in a similar manner to under IAS 39, however there are differences in the requirements applying to the measurement of an entity's own credit risk.
- **Impairment**: The 2014 version of IFRS 9 introduces an 'expected credit loss' model for the measurement of the impairment of financial assets, so it is no longer necessary for a credit event to have occurred before a credit loss is recognised
- **Hedge accounting**: Introduces a new hedge accounting model that is designed to be more closely aligned with how entities undertake risk management activities when hedging financial and non-financial risk exposures.
- **Derecognition**: The requirements for the derecognition of financial assets and liabilities are carried forward from IAS 39.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

2. Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.2 New and revised IFRS in issue but not yet effective (continued)

New and revised IFRSs	Effective for annual periods beginning on or after
IFRS 15 *Revenue from Contracts with Customers*	1 January 2018

In May 2014, IFRS 15 was issued which established a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. IFRS 15 will supersede the current revenue recognition guidance including IAS 18 *Revenue*, IAS 11 *Construction Contracts* and the related interpretations when it becomes effective.

The core principle of IFRS 15 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

Under IFRS 15, an entity recognises when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer. Far more prescriptive guidance has been added in IFRS 15 to deal with specific scenarios. Furthermore, extensive disclosures are required by IFRS 15.

Amendments to IFRS 15 *Revenue from Contracts* with Customers to clarify three aspects of the standard (identifying performance obligations, principal versus agent considerations, and licensing) and to provide some transition relief for modified contracts and completed contracts.	1 January 2018
IFRS 16 *Leases*	1 January 2019

IFRS 16 specifies how an IFRS reporter will recognise, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognise assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

2. Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.2 New and revised IFRS in issue but not yet effective (continued)

New and revised IFRSs	Effective for annual periods beginning on or after
Amendments to IFRS 10 *Consolidated Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures* (2011) relating to the treatment of the sale or contribution of assets from and investor to its associate or joint venture.	Effective date deferred indefinitely

Management anticipates that these new standards, interpretations and amendments will be adopted in the Company's financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, except for IFRS 9, IFRS 15 and IFRS 16, may have no material impact on the financial statements of the Company in the period of initial application.

Management anticipates that IFRS 15 and IFRS 9 will be adopted in the Company's financial statements for the annual period beginning 1 January 2018 and that IFRS 16 will be adopted in the Company's financial statements for the annual period beginning 1 January 2019. The application of IFRS 15 and IFRS 9 may have significant impact on amounts reported and disclosures made in the Company's financial statements in respect of revenue from contracts with customers and the Company's financial assets and financial liabilities and the application of IFRS 16 may have significant impact on amounts reported and disclosures made in the Company's financial statements in respect of its leases.

However, it is not practicable to provide a reasonable estimate of effects of the application of these standards until the Company performs a detailed review.

3. Significant accounting policies

The significant accounting policies applied in the preparation of these financial statements are summarised below. These policies have been consistently applied to each of the years presented.

3.1 Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and applicable requirements of United Arab Emirates (U.A.E.) Federal Law No. (2) of 2015 and United Arab Emirates (U.A.E.) Federal Law No. 6 of 2007 on Establishment of Insurance Authority and Organization of its Operations.

On 28 December 2014, the United Arab Emirates (UAE) Insurance Authority issued Financial Regulations for insurance companies and were then subsequently published in the UAE Official Gazette No. 575 on 28 January 2015 and came into force on 29 January 2015. The insurers are given a grace period of between one to three years to comply with the Financial Regulations, depending on the section involved.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.1 Statement of compliance (continued)

The Company is in discussions with the Insurance Authority regarding compliance of the requirements of the Financial Regulations issued by the Insurance Authority especially pertaining to Article (1) of Section (7) and Appendix (1) relating to presentation of financial statements and disclosures.

3.2 Basis of preparation

The financial statements have been prepared on the historical cost basis except for revaluation of certain financial instruments as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1,2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
  Level 3 inputs are unobservable inputs for the assets or liability.

The Company presents its statement of financial position broadly in order of liquidity, with a distinction based on expectations regarding recovery or settlement within twelve months after the reporting date (current) and more than twelve months after the reporting date (non-current), presented in the notes.

The principal accounting policies are set out below.

3.3 Insurance contracts

As disclosed in Note 3.1 to the financial statements, the financial regulation issued by Insurance Authority provide an alignment period to the insurance companies between one to three years from the publication of financial regulation in Public Gazette from 29 January 2015 to align the operations to the covenants of the regulations therein. The Company is in the process of aligning the operations with the requirement of the regulations relating to investment operations.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.3 Insurance contracts (continued)

On 1 January 2016, the Company has adopted the above directives that relates to basis of recognising technical reserves based on external independent valuers report and has also created provision relating to unallocated loss adjustment expenses. Prior to the above adoption, the Company had accounted for technical reserves for insurance contracts using internal statistical model.

On 1 April 2016, the management has voluntarily changed the Company's accounting policies in respect of the commission income.

The Company has recognised commissions received from reinsurance premium ceded as commission income in the period in which premium was ceded to the reinsurers, in the prior years. The change in accounting policy in the current year resulted in deferring these amounts as deferred commission and recognizing as income using the same methodology adopted for the amortization of the related DAC of these policies.

The principal accounting policies that have been changed due to the change in accounting policies described above are set out in note 3.4.5 below.

Management takes the view that the involvement of external actuary and deferment of commission income provides more relevant and reliable information of the Company's financial performance and financial position to the economic decisions making of the users of the financial statements. The change in accounting policy has been prospectively applied by the Company. The effects of change in accounting policy are described in note 28 to the financial statements.

3.3.1 Definition, recognition and measurement

The Company issues contracts that transfer insurance risk. Insurance contracts are those contracts that transfer significant insurance risk.

Insurance contracts are classified into two main categories, depending on the duration of risk and whether or not the terms and conditions are fixed.

3.3.2 Short-term insurance contracts

These contracts are medical, casualty, property and short-duration life insurance contracts.

Casualty insurance contracts protect the Company's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non contractual events.

Property insurance contracts mainly compensate the Company's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

Medical insurance contracts protect the Company's customers against the risk of incurring medical expenses. Medical selection is part of the Company's underwriting procedures, whereby contributions are charged to reflect the health condition and family medical history of the applicants. Pricing is based on assumptions, such as mortality and persistency, which consider past experience and current trends. Contracts including specific risks and guarantees are tested for profitability according to predefined procedures before approval.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.3 Insurance contracts (continued)

3.3.2 Short-term insurance contracts (continued)

Products are reviewed by the business units on an annual basis to confirm, or otherwise, that pricing assumptions remain appropriate. Analysis is performed on earnings and liability movements to understand the source of any material variation in actual results from what was expected. This confirms the appropriateness of assumptions used in underwriting and pricing.

Short-duration life insurance contracts protect the Company's customers from the consequences of events that would affect on the ability of the customer or customer's dependents to maintain their current level of income. Guaranteed benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policyholder. There are no maturity or surrender benefits.

For all these insurance contracts, premiums are recognised as revenue (earned premiums) on time-proportion basis wherein revenue from an insurance contract is recognised over the effective period of the policy with the exception of marine, where the UPR is recognised as fixed proportion of the written premiums as required in the financial regulation issued by Insurance Authority. The portion of premium received on in-force contracts that relates to unexpired risks at the end of the reporting period is reported as the unearned premium liability.

Claims and loss adjustment expenses are charged to profit or loss as incurred based on the estimated liability for compensation owed to contract holders or third parties damaged by the contract holders. They include direct claims settlement costs and arise from events that have occurred up to the reporting date even if even they have not yet been reported to the Company. The Company does not discount its liabilities for unpaid claims. Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the Company and statistical analyses for the claims incurred but not reported, and to estimate the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

Unallocated loss adjustment expense reserves correspond to the provision representing future claim expenses and related handling costs that are not case specific. It represents all other expenses and costs that are related to the adjudication of claims but cannot be assigned to a specific claim and is calculated based on recommendation of Company's external actuarial valuation report.

3.3.3 Reinsurance contracts

Contracts entered into by the Company with reinsurers under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for insurance contracts are classified as reinsurance contracts. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Company under which the contract holder is another insurer are included with insurance contracts. The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance contract assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due. The Company assesses its reinsurance contract assets for impairment on a regular basis. If there is objective evidence that the reinsurance contract asset is impaired, the Company reduces the carrying amount of the reinsurance contract assets to its recoverable amount and recognises that impairment loss in the profit or loss. The Company gathers the objective evidence that a reinsurance asset is impaired using the same process adopted for financial assets held at amortised cost. The impairment loss is also calculated following the same method used for these financial assets.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.3 Insurance contracts (continued)

3.3.4 Insurance contract liabilities

Insurance contract liabilities towards outstanding claims are made for all claims intimated to the Company and still unpaid at the end of the reporting period, in addition for claims incurred but not reported.

The reinsurers' portion of the above outstanding claims and unearned premium is classified as reinsurance contract assets in the financial statements.

3.3.5 Deferred policy acquisition costs (DAC)

Commissions and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are capitalised as an intangible asset (DAC). All other costs are recognised as expenses when incurred. DAC is amortised over the terms of the policies as premium is earned;

3.3.6 Salvage and subrogation reimbursements

Estimates of salvage and subrogation reimbursements are considered as an allowance in the measurement of the insurance liability for claims

3.3.7 Liability adequacy test

At the end of each reporting period, the Company assesses whether its recognised insurance liabilities are adequate using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate in the light of estimated future cash flows, the entire deficiency is immediately recognised in income and an unexpired risk provision is created.

3.3.8 Receivables and payables related to insurance contracts

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders.

If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in profit or loss. The Company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables. The impairment loss is also calculated under the same method used for these financial assets

3.4 Revenue recognition

3.4.1 Insurance contract income

Revenue from insurance contracts is measured under revenue recognition criteria stated under insurance contracts in these financial statements (Note 3.3).

3.4.2 Interest income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the asset's net carrying amount.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.4 Revenue recognition (continued)

3.4.3 Dividend income

Dividend income from investments is recognised when the Company's rights to receive payment have been established.

3.4.4 Rental income

Rental income from investment property which are leased under operating leases are recognised on a straight-line basis over the term of the relevant lease.

3.4.5 Deferred commission income

Commission received when the reinsurance premium is ceded based on the terms and percentages agreed with the reinsurers is recognised as deferred commission income. These commissions are recognised as commission income using the same methodology adopted for the amortization of DAC.

3.5 General and administrative expenses

Direct expenses are charged to the respective departmental revenue accounts. Indirect expenses are allocated to departmental revenue accounts on the basis of gross written premiums of each department. Other administration expenses are charged to profit or loss as unallocated general and administrative expenses.

3.6 Foreign currencies

The financial statements of the Company are presented in the currency of the primary economic environment in which the Company operates (its functional currency). For the purpose of the financial statements, the results and financial position of the Company are expressed in Arab Emirates Dirhams ("AED"), which is the functional currency of the Company and the presentation currency for the financial statements.

In preparing the financial statements of the Company, transactions in currencies other than the Company's functional currency (foreign currencies) are recorded at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the year in which they arise.

3.7 Employee benefits

3.7.1 Defined contribution plan

U.A.E. national employees of the Company are members of the Government-managed retirement pension and social security benefit scheme pursuant to U.A.E. labour law no. 7 of 1999. The Company is required to contribute 12.5% of the "contribution calculation salary" of payroll costs to the retirement benefit scheme to fund the benefits. The employees and the Government contribute 5% and 2.5% of the "contribution calculation salary" respectively, to the scheme. The only obligation of the Company with respect to the retirement pension and social security scheme is to make the specified contributions. The contributions are charged to profit or loss.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.7 Employee benefits (continued)

3.7.2 Annual leave and leave passage

An accrual is made for the estimated liability for employees' entitlement to annual leave and leave passage as a result of services rendered by eligible employees up to the end of the year.

3.7.3 Provision for employees' end of service indemnity

Provision is also made for the full amount of end of service indemnity due to non-U.A.E. national employees in accordance with the U.A.E. Labour Law and is based on current remuneration and their period of service at the end of the reporting period.

The accrual relating to annual leave and leave passage are current liabilities, while the provision relating to end of service indemnity is a non-current liability.

3.8 Property and equipment

Property and equipment are carried at cost less accumulated depreciation and any identified impairment losses. Depreciation is charged so as to write off the cost of assets over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

The estimated useful lives with their comparatives for various categories of property and equipment is as follows:

Buildings	25 years
Furniture and fixtures	4 years
Office equipment	4 years
Motor vehicles	4 years
Computer equipment	4 years

3.9 Investment properties

Investment properties are properties held to earn rentals and/or for capital appreciation including properties under construction for such purposes. Investment properties are measured initially at cost, including transaction costs. Cost includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the cost of day to day servicing of an investment property.

Depreciation is charged so as to write off the cost of assets over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The useful life of investment properties is estimated at 30 years.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the profit or loss in the period of retirement or disposal.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.10 Intangible assets

Intangible assets are reported at cost less accumulated amortisation and identified impairment losses, if any. Amortisation is charged on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. The useful lives considered in the calculation of amortisation is 5 years.

3.11 Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

3.12 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.13 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

3.14 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. The Company has no finance leases.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

3.15 Financial assets

All financial assets are recognised and derecognised on trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at held for trading, which are initially measured at fair value.

Financial assets of the Company are classified into the following specified securities categories: cash and cash equivalents, 'available-for-sale (AFS securities), held for trading investments, held to maturity investments and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

3.15.1 Bank balances and cash

Bank balances and cash comprise cash on hand and fixed deposits and current and call accounts with banks that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.15 Financial assets (continued)

3.15.2 Held for trading investment

Financial assets are classified as at held for trading, where the financial assets is either held for trading or is designated as such on initial recognition.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling in the near future; or
- it is a part of an identified portfolio of financial instruments that the Company manages together and has a recent actual pattern of short- term profit taking.

Investment held for trading are stated at fair value, with any resultant gain or loss recognised in profit or loss.

3.15.3 AFS securities

Listed shares held by the Company that are traded in an active market are classified as being AFS and are stated at fair value. Gains and losses arising from changes in fair value are recognised in other comprehensive income and accumulated in the cumulative changes in fair value of available-for-sale securities reserve with the exception of impairment losses, which are recognised in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the cumulative change in fair value is reclassified to profit or loss.

Dividend on AFS securities are recognised in profit or loss when the Company's right to receive the dividend is established.

3.15.4 Held-to-maturity investments

If the Company has the positive intent and ability to hold debt securities to maturity, and these debt securities have not been designated at held-for-trading, then they are classified as held-to-maturity. Held-to-maturity are measured at amortised cost using the effective interest method, less any impairment losses.

3.15.5 Loans and receivables

Insurance and other receivables (excluding prepayments) that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are initially measured at fair value, plus transaction costs and subsequently measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.15 Financial assets (continued)

3.15.6 Impairment of financial assets

Financial assets, other than those at held for trading, are assessed for indicators of impairment at the end of each reporting date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the asset have been affected.

For investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For certain categories of financial asset, such as insurance and other receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio as well as observable changes in national or local economic conditions that correlate with default on receivables.

For held to maturity investment, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of insurance receivables, where the carrying amount is reduced through the use of an allowance account. When a contract receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS securities is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

With the exception of AFS, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income.

3.15.7 Derecognition of financial assets

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire; or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

3. Significant accounting policies (continued)

3.16 Financial liabilities and equity instruments issued by the Company

3.16.1 Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

3.16.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

3.16.3 Financial liabilities

Financial liabilities are classified as 'other financial liabilities'.

3.16.4 Other financial liabilities

Insurance and other payables are classified as 'other financial liabilities' and are initially measured at fair value, net of transaction costs. Other financial liabilities (except for deferred reinsurance commission) are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis except for short term payable when the recognition of interest would be immaterial.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

3.16.5 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

3.16.6 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividend is approved by the Company's shareholders.

4. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in Note 3 to these financial statements, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

4. Critical accounting judgements and key sources of estimation uncertainty (continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

4.1 Critical accounting judgements

The following are the critical judgements, apart from those involving estimations (see 4.2 below), that management has made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

4.1.1 Classification of investments

Management decides on acquisition of an investment whether it should be classified as held to maturity, held for trading or AFS. The Company classifies investments at held for trading if they are acquired primarily for the purpose of making a short term profit by the dealers.

Equity instruments are classified as AFS securities when they are considered by management to be strategic equity investments that are not held to benefit from changes in their fair value and are not held for trading.

Management is satisfied that the Company's investments in securities are appropriately classified.

4.1.2 Classification of properties

In the process of classifying properties, management has made various judgments. Judgments are needed to determine whether a property qualifies as an investment property, property and equipment, property under development and/or property held for sale. Management develops criteria so that it can exercise that judgment consistently in accordance with the definitions of investment property, property and equipment, property under development and property held for sale. In making its judgment, management has considered the detailed criteria and related guidance set out in IAS 2 – Inventories, IAS 16 – Property, Plant and Equipment, and IAS 40 – Investment Property, with regards to the intended use of the property.

4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

4.2.1 The ultimate liability arising from claims made under insurance contracts

The estimation of ultimate liability arising from the claims made under insurance contracts is the Company's most critical accounting estimate. There are sources of uncertainty that need to be considered in the estimate of the liability that the Company will eventually pay for such claims. Estimates have to be made both for the expected ultimate cost of claims reported and for the expected ultimate cost of claims incurred but not reported ("IBNR") at the end of each reporting period. Liabilities for unpaid reported claims are estimated using the input of assessments for individual cases reported to the Company and management estimates based on internal and external actuarial assessment, taking into account the historical data of the claims reported and settlement pattern. Such method takes into account the best estimates of the future contractual cash flows estimated based on the historical data. At the end of each reporting period, prior year claims estimates are reassessed for adequacy and changes are made to the provision.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

4. Critical accounting judgements and key sources of estimation uncertainty (continued)

4.2 Key sources of estimation uncertainty (continued)

4.2.2 Impairment of insurance receivables

An estimate of the collectible amount of insurance receivables is made when collection of the full amount is no longer probable. This determination of whether the insurance receivables are impaired, entails the Company evaluating, the credit and liquidity position of the policyholders and the insurance companies, historical recovery rates including detailed investigations carried out during 2016 and feedback received from the legal department. The difference between the estimated collectible amount and the book amount is recognised as an expense in the profit or loss. Any difference between the amounts actually collected in the future periods and the amounts expected will be recognised in the profit or loss at the time of collection.

4.2.3 Liability adequacy test

At the end of each reporting period, liability adequacy tests are performed to ensure the adequacy of insurance contract liabilities. The Company makes use of the best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities in evaluating the adequacy of the liability. Any deficiency is immediately charged to the profit or loss.

4.2.4 Amortization of deferred acquisition costs ("DAC") and deferred commission income

Deferred acquisition costs are amortized using methods that provide the most appropriate bases of recognizing acquisition costs as expenses in line with the recognition of revenue from related insurance contracts. The various assumptions, inputs and estimates are used in these calculations by management.

4.2.5 Valuation of quoted equity instruments with no trading in stock exchange

Valuation of quoted equity investments with no trading in stock exchange is normally based on recent market transactions on an arm's length basis, fair value of another instrument that is substantially the same, expected cash flows discounted at current rates for similar instruments or other valuation models. In the absence of an active market for these investments or any recent transactions that could provide evidence of the current fair value, management estimates the fair value of these instruments using expected cash flows discounted at current rates for similar instruments or other valuation models. Management has appointed external independent consultants for valuation of such instrument.

4.2.6 Depreciation of property and equipment and investment property

The cost of property and equipment and investment property is depreciated over the estimated useful life, which is based on expected usage of the asset, expected physical wear and tear, the repair and maintenance program and technological obsolescence arising from changes and the residual value. Management has not considered any residual value as it is deemed immaterial.

4.2.7 Impairment of intangible assets

The period of amortisation of the intangible assets is determined based on the pattern in which the asset's future economic benefits are expected to be consumed by the Company and technological obsolescence. Management has concluded that no impairment of intangible assets is required based on impairment test performed by the Company as of the reporting date.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

4. Critical accounting judgements and key sources of estimation uncertainty (continued)

4.2 Key sources of estimation uncertainty (continued)

4.2.8 Impairment of available-for-sale securities

The Company determines whether available for sale securities are impaired when there has been a significant or prolonged decline in their fair value below cost. This determination of what is significant or prolonged requires judgement. In making this judgement and to record whether impairment occurred, the Company evaluates among other factors, the normal volatility in share price, the financial health of the investee, industry and sector performance, changes in technology and operational and financial cash flows.

Management has considered Nil (2015: AED 12,500,000) as impairment loss on available-for-sale securities for the year, based on the analysis of impairment test performed on available-for-sale securities.

5. Property and equipment

At 31 December 2015	3,500,000	2,337,182	5,837,182

Investment properties are located in U.A.E.

The fair value of the Company's investments properties as at 31 December 2016 amounted to AED 23.5 million (2015: AED 8.2 million) and have been arrived at on the basis of valuations carried by external valuers who have appropriate market experience in the valuation of properties in the United Arab Emirates.

The fair value was determined based on the market comparable approach that reflects recent transactions prices for similar properties. In estimating the fair value of the properties, the highest and best use of the properties is their current use. There has been no change to the valuation technique during the year.

The Company's investment properties are classified as Level 3 in the fair value hierarchy as at 31 December 2016 (2015: Level 3).

Notes to the financial statements
For the year ended 31 December 2016 (continued)

6. Investment properties (continued)

The property rental income earned by the Company from its investment properties and the direct operating expenses related to the investment properties are as follows:

8. Investment in securities

The Company's investment in securities at the end of reporting period are detailed below.

	2016 AED	2015 AED
Held for trading	**4,184,794**	3,965,527
Available-for sale securities	**10,314,691**	30,816,580
Held to maturity	**-**	3,707,200
	14,499,485	38,489,307

Held for trading comprise of investments in funds with in United Arab Emirates.

Available for sale securities comprise of quoted equity shares in United Arab Emirates. There is no impairment of available for sale securities during the year (2015: AED 12,500,000).

Held of maturity investment comprise of fixed income investments within United Arab Emirates.

The Company has not purchased any investments during the year.

9. Statutory deposit

A deposit of AED 10,000,000 (2015: AED 10,000,000) has been placed with one of the Company's bankers, in accordance with local insurance regulatory requirements. This deposit has been pledged to the Bank as security against a guarantee issued by the Bank in favour of the Insurance Authority for the same amount. This deposit cannot be withdrawn without prior approval of the Insurance Authority and bears an interest rate of 2% per annum. (2015: 2% per annum).

Notes to the financial statements
For the year ended 31 December 2016 (continued)

10. Insurance contract liabilities and reinsurance contract assets

	2016 AED	2015 AED
Insurance contract liabilities

11. Insurance and other receivables

	2016 AED	2015 AED
Premium receivable	**208,734,208**	138,863,438
Reinsurance companies	**17,405,564**	9,427,289
Insurance agents and brokers	**834,868**	3,165,817
Due from related parties	**14,871,136**	23,277,553
Accrual of interest and other income	**4,007,720**	1,858,354
Advances and prepayments	**5,494,911**	2,204,914
Deferred capitation fee	**29,162,655**	12,050,576
Other receivables	**16,705,051**	13,012,519
	297,216,113	203,860,460
Less: Allowance for doubtful receivables	**(18,495,278)**	(10,545,278)
	278,720,835	193,315,182

The average credit period is 90 days. Receivables are provided for based on estimated irrecoverable amounts determined by reference to past default experience.

Before accepting any new customer, the Company assesses the potential customers' credit quality and defines credit limits by customer. Of the due from receivables balance at the end of year, AED 8.9 million (2015: AED 8 million) is due from the Company's largest customer.

Included in the Company's receivable balances with a carrying amount of AED 5.6 million (2015: AED 10.1 million) which are past due above 365 days at the reporting date for which the Company has not considered provision for impairment as there has not been a significant change in credit quality and the amounts are still considered recoverable.

Ageing of insurance receivables:

	2016		2015	
	Gross AED	**Allowance AED**	Gross AED	Allowance AED
0 - 90 days	**139,146,318**	-	102,010,286	-
91 - 180 days	**27,015,014**	-	34,275,040	-
181 - 270 days	**16,769,458**	-	9,907,824	-
271 - 365 days	**34,854,892**	-	7,878,959	-
Above 365 days	**24,060,094**	**(18,495,278)**	20,661,988	(10,545,278)
	241,845,776	**(18,495,278)**	174,734,097	(10,545,278)

Notes to the financial statements
For the year ended 31 December 2016 (continued)

11. Insurance and other receivables (continued)

Movements in allowance for doubtful debts:

	2016 AED	2015 AED
Balance at the beginning of the year	**10,545,278**	18,865,000
Allowance made during the year	**7,950,000**	9,359,173
Write-off for the year	**-**	(17,678,895)
Balance at the end of the year	**18,495,278**	10,545,278

In determining the recoverability of an insurance receivable, the Company considers any change in the credit quality of the insurance receivable from the date credit was initially granted up to the reporting date.

The concentration of credit risk is limited due to the customer base being large and unrelated. Accordingly, the directors believe that there is no further credit provision required in excess of the available allowance for doubtful debts.

12. Bank balances and cash

	2016 AED	2015 AED
Cash in hand	**553,752**	118,794
Cash at bank	**41,047,711**	57,949,056
Fixed deposits	**182,476,634**	188,682,288
	224,078,097	246,750,138
Less: deposits with maturities of greater than three months	**(179,738,162)**	(127,549,799)
Less: fixed deposits under lien	**(300,000)**	(300,000)
	44,039,935	118,900,339

Fixed deposits are under lien against letters of guarantee issued to the Company (Note 21).

The interest rate on fixed deposits with banks is 1.5% to 3.45% (2015: 0.8% to 3.25%) per annum. All fixed deposits are held in local banks in the United Arab Emirates.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

13. Share capital

	2016 AED	2015 AED
Authorised, issued and fully paid:		
110,000,000 ordinary shares of AED 1 each (2015: 110,000,000 ordinary shares of AED 1 each)	**110,000,000**	110,000,000

14. Reserves

14.1 Statutory reserve

In accordance with U.A.E. Federal Law Number (2) of 2015, the Company has established a statutory reserve by appropriation of 10% of profit for each year until the reserve equals 50% of the paid-up share capital. This reserve is not available for distribution except as stipulated by the Law.

14.2 Voluntary reserve

The Company had set up the voluntary reserve by transferring 10% of annual profit as per the clause in the earlier Articles of Association which required at least 10% of the Company's annual profit must be transferred to voluntary reserve until it is suspended by an Ordinary General Meeting upon recommendations of the Board of Directors or when the reserve reaches 20% of the paid up capital of Company and this reserve can be utilized for purposes determined by the Ordinarily General meeting up on recommendation of the Board of Directors.

During 2016, the Company had amended its Articles of Association and the clause related to voluntary reserve states that a voluntary purpose reserve can be created upon a recommendation of the Board of Directors and this reserve cannot be utilized for any other purpose unless approved by the Ordinarily General meeting.

As per the above amendment, no transfer to voluntary reserve is made during 2016.

15. Provision for employees' end of service indemnity

Movements in the net liability were as follows:

	2016 AED	2015 AED
Balance at the beginning of the year	**3,443,821**	3,997,807
Amounts charged to income during the year	**1,924,197**	432,429
Amounts paid during the year	**(559,163)**	(986,415)
	4,808,855	3,443,821

Notes to the financial statements
For the year ended 31 December 2016 (continued)

16. Insurance and other payables

	2016 AED	2015 AED
Creditors	**59,715,277**	22,248,968
Reinsurance companies	**36,505,619**	40,879,310
Due to related parties	**67,964**	715,354
Accrued expenses	**515,750**	2,473,297
Employees' benefits	**2,407,000**	2,375,638
Commission payable	**21,930,976**	13,896,424
Deferred reinsurance commission	**3,597,163**	-
Other payable balances	**4,134,279**	2,079,036
Dividends payable	**2,226,185**	2,305,862
	131,100,213	86,973,889

17. Net insurance premium revenue

	2016 AED	2015 AED
Gross premium written		
Gross premium written	**421,962,390**	407,540,441
Change in unearned premium (Note 10)	**(3,334,204)**	(35,584,104)
	418,628,186	371,956,337
Reinsurance premium ceded		
Reinsurance premium ceded	**(87,728,474)**	(115,071,888)
Change in unearned premium (Note 10)	**(8,393,677)**	13,616,853
	(96,122,151)	(101,455,035)
Net insurance premium revenue	**322,506,035**	270,501,302

Notes to the financial statements
For the year ended 31 December 2016 (continued)

18. Investment income – (net)

	2016 AED	2015 AED
Unrealised gain/(loss) on held for trading investments	**219,267**	(515,297)
Dividend from investments	**1,133,845**	1,339,712
Income from investment properties (Note 6)	**150,150**	108,188
Interest income	**4,435,663**	3,660,279
Profit from disposal of investment properties	**950,000**	-
Profit from disposal of investment securities	**9,615,555**	-
	16,504,480	4,592,882

19. Profit for the year

Profit for the year has been arrived at after charging the following expenses:

	2016 AED	2015 AED
Staff costs	**33,104,521**	26,860,306
Depreciation of property and equipment	**1,832,254**	1,241,758
Amortisation of intangible assets	**971,703**	176,331
Depreciation of investment properties	**565,166**	194,765

Social contributions during the year amounted to AED 75,000 (2015: AED 5,000).

20. Basic earnings per share

	2016	2015
Profit for the year (in AED)	**23,397,375**	23,100,773
Number of shares	**110,000,000**	110,000,000
Basic earnings per share (in AED)	**0.21**	0.21

Basic earnings per share has been calculated by dividing the profit for the year by the number of shares outstanding at the end of the reporting period.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

21. Related party transactions

Related parties include the Company's major Shareholders, Directors and businesses controlled by them and their families over which they exercise significant management influence as well as key management personnel.

At the end of the reporting period, amounts due from/to related parties were as follows:

	2016	2015
	AED	AED
Due from policyholders	**14,871,136**	23,277,553
Due to policyholders	**67,964**	715,354
Fixed deposit	**34,000,000**	34,000,000

The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received and no expense has been recognised in the year for bad or doubtful debts in respect of the amounts owed by related parties.

Transactions:

During the year, the Company entered into the following transactions with related parties:

	2016	2015
	AED	AED
Purchase of investment properties	**16,908,529**	-
Gross premium written	**31,879,245**	73,444,857
Claims paid	**46,131,841**	5,124,139
Dividend	**5,059,382**	5,538,187

The Company has entered into above transactions with related parties which were made on substantially the same terms, as those prevailing at the same time for comparable transactions with third parties.

Compensation of board of directors/key management personnel

	2016	2015
	AED	AED
Short-term benefits	**2,555,417**	1,262,625
Long-term benefits	**184,287**	73,299
Board of directors' remuneration	**1,400,000**	1,300,000
Directors' fees	-	35,000

Notes to the financial statements
For the year ended 31 December 2016 (continued)

22. Contingent liabilities

	2016 AED	2015 AED
Letters of guarantee	**10,429,900**	10,300,000

The above bank guarantees were issued in the normal course of business.

The Company, in common with the significant majority of insurers, is subject to litigation in the normal course of its business. The Company, based on independent legal advice, does not expect that the outcome of these court cases will have a material impact on the Company's financial performance or financial position.

23. Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the estimate established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The Company manages risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography. Underwriting limits are in place to enforce appropriate risk selection criteria.

23.1 Frequency and severity of claims

The Company has the right not to renew individual policies, re-price the risk, impose deductibles and reject the payment of a fraudulent claim. Insurance contracts also entitle the Company to pursue third parties for payment of some or all costs (for example, subrogation).

Property insurance contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claim payment limits are always included to cap the amount payable on occurrence of the insured event. Cost of rebuilding properties, of replacement or indemnity for contents and time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. Property insurance contracts are subdivided into four risk categories: fire, business interruption, weather damage and theft. The insurance risk arising from these contracts is not concentrated in any of the territories in which the Company operates, and there is a balance between commercial and personal properties in the overall portfolio of insured buildings.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

23. Insurance risk (continued)

23.1 Frequency and severity of claims (continued)

The reinsurance arrangements include excess and catastrophe coverage. The effect of such reinsurance arrangements is that the Company should not suffer net insurance losses of a set limit of AED 300,000 for motor and AED 50,000 for medical class of business in any one policy. The Company has survey units dealing with the mitigation of risks surrounding claims. This unit investigates and recommends ways to improve risk claims. The risks are reviewed individually at least once a year and adjusted to reflect the latest information on the underlying facts, current law, jurisdiction, contractual terms and conditions, and other factors. The Company actively manages and pursues early settlements of claims to reduce its exposure to unpredictable developments.

23.2 Sources of uncertainty in the estimation of future claim payments

Claims on insurance contracts are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and element of the claims provision includes incurred but not reported claims (IBNR). The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the insured until many years after the event that gave rise to the claims. For some insurance contracts, the IBNR proportion of the total liability is high and will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities. In estimating the liability for the cost of reported claims not yet paid, the Company considers information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Apart from internal actuary, the Company has involved independent external actuarial valuer's as well. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

The amount of insurance claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort. Insurance contracts are also subject to the emergence of new types of latent claims, but no allowance is included for this at the reporting date.

Where possible, the Company adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

23. Insurance risk (continued)

23.2 Sources of uncertainty in the estimation of future claim payments (continued)

In calculating the estimated cost of unpaid claims (both reported and not), the Company's estimation techniques are a combination of loss-ratio-based estimates and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes. The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation. The initial estimate of the loss ratios used for the current year (before reinsurance) are analysed by type of risk where the insured operates for current and prior year premiums earned.

23.3 Process used to decide on assumptions

The risks associated with these insurance contracts are complex and subject to a number of variables that complicate quantitative sensitivity analysis. Internal data is derived mostly from the Company's quarterly claims reports and screening of the actual insurance contracts carried out at the end of the reporting period to derive data for the contracts held. The Company has reviewed the individual contracts and in particular the industries in which the insured companies operate and the actual exposure years of claims. This information is used to develop scenarios related to the latency of claims that are used for the projections of the ultimate number of claims.

The choice of selected results for each accident year of each class of business depends on an assessment of the technique that has been most appropriate to observed historical developments. In certain instances, this has meant that different techniques or combinations of techniques have been selected for individual accident years or groups of accident years within the same class of business. The Company has an internal actuary and independent external actuaries are also involved in the valuation of technical reserves of the Company.

23.4 Concentration of insurance risk

Substantially all of the Company's underwriting activities are carried out in the United Arab Emirates. In common with other insurance companies, in order to minimise financial exposure arising from large insurance claims, the Company, in the normal course of business, enters into arrangement with other parties for reinsurance purposes.

To minimise its exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk arising from similar geographic regions, activities or economic characteristics of the reinsurers. Reinsurance ceded contracts do not relieve the Company from its obligations to policyholders. The Company remains liable to its policyholders for the portion reinsured to the extent that any reinsurer does not meet the obligations assumed under the reinsurance agreements.

23.5 Sensitivity of underwriting profit and losses

The contribution by the insurance operations is a profit of AED 24.6 million for the year ended 31 December 2016 (2015: AED 42.4 million). The Company does not foresee any major impact from insurance operations to the Company's results and expects to increase the contribution by insurance operations to the profitability due to the following reasons:

The Company has an overall retention level of 73% (2015: 72%). The risk is adequately covered by excess of loss reinsurance programs to guard against major financial impact.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

24. Capital risk management

The Company's objectives when managing capital are:

- to comply with the insurance capital requirements required by U.A.E. Federal Law No. 6 of 2007, on Establishment of Insurance Authority and Organization of its Operations.
- to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to provide an adequate return to shareholders by pricing insurance contracts commensurately with the level of risk.

In U.A.E., Insurance Authority specifies the minimum amount and type of capital that must be held by the Company in addition to its insurance liabilities. The minimum required capital (presented in the table below) must be maintained at all times throughout the year.

The table below summarises the minimum required capital of the Company and the total capital held.

	2016 AED	2015 AED
Total capital held	**110,000,000**	110,000,000
Minimum regulatory capital	**100,000,000**	100,000,000

The UAE Insurance Authority has issued resolution no. 42 for 2009 setting the minimum subscribed or paid up capital of AED 100 million for establishing insurance firms and AED 250 million for reinsurance firms. The resolution also stipulates that at least 75 percent of the capital of the insurance companies established in the UAE should be owned by UAE or GCC national individuals or corporate bodies.

The table below summarises the Minimum Capital Requirement, Minimum Guarantee Fund and Solvency Capital Requirement of the Company and the total capital held to meet these required Solvency Margins.

	2016 AED	2015 AED
Minimum Capital Requirement (MCR)	**100,000,000**	100,000,000
Solvency Capital Requirement (SCR)	**140,306,441**	116,205,000
Minimum Guarantee Fund (MGF)	**102,127,526**	87,389,000
Own Funds		
Basic Own Funds	**161,517,119**	137,519,000
Ancillary Own Funds	**-**	-
MCR Solvency Margin - Minimum Capital Requirement	**61,517,119**	37,519,000
MCR Solvency Margin Solvency Capital Requirement	**21,210,678**	21,314,000
MCR Solvency Margin Minimum Guarantee Fund	**59,389,593**	50,130,000

Notes to the financial statements
For the year ended 31 December 2016 (continued)

25. Financial instruments

The Company is exposed to a range of financial risks through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long-term its investment proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are interest rate risk, equity price risk, foreign currency risk and credit risk.

25.1 Significant accounting policies

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 3 to the financial statements.

25.2 Categories of financial instruments

	2016	2015
	AED	AED
Financial assets		
Available for sale in securities	**10,314,691**	30,816,580
Held for trading investments	**4,184,794**	3,965,527
Held to maturity investments	**-**	3,707,200
Statutory deposit	**10,000,000**	10,000,000
Insurance and other receivables	**244,063,269**	179,059,692
Bank balances and cash	**224,078,097**	246,750,138
Total	**492,640,851**	474,299,137
Financial liabilities		
Insurance and other payables	**127,503,050**	86,973,889

Management considers that the carrying amounts of financial assets and financial liabilities recognized at amortised cost in the financial statements approximate their fair values.

25.3 Fair value measurements

The fair values of financial assets and financial liabilities are determined as follows:

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market bid prices at the close of the business on the reporting date.

- The fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Notes to the financial statements
for the year ended 31 December 2016 (continued)

25. Financial instruments (continued)

25.4 Fair value of financial instruments carried at amortised cost

Management considers that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values except for financial investments measured at amortised cost of which fair value is determined based on the quoted market prices and disclosed in note 6 of these financial statements.

Valuation techniques and assumptions applied for the purposes of measuring fair value

25.4.1 Fair value measurements recognised in the statement of financial position

Some of the Company's financial assets are measured at fair value at the end of the reporting period. The following table gives information about how the fair values of these financial assets are determined;

Financial assets	Fair value as at 2016 AED	2015 AED	Fair value hierarchy	Valuation techniques and key inputs	Significant unobservable input	Relationship of unobservable inputs to fair value
Available-for-sale securities – Quoted						
Actively traded	**2,814,691**	18,316,580	Level 1	Quoted bid prices in an active market.	None.	NA
Not actively traded	**7,500,000**	12,500,000	Level 3	Net asset valuation method, due to unavailability of market and comparable financial information. Net asset values was determined based on the latest available audited/ historical financial information	Net assets value.	Higher the net assets value of investees, higher the fair value
Held for trading investment						
Funds	**4,184,794**	3,965,527	Level 1	Quoted bid prices in an active market.	None.	NA

There were no transfers between each of level during the period. There are no financial liabilities which should be measured at fair value and accordingly no disclosure is made in the above table.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

25. Financial instruments (continued)

25.5 Market risk

The Company's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

Market risk exposures are measured using sensitivity analysis. There has been no change to the Company's exposure to market risks or the manner in which it manages and measures the risk.

25.6 Foreign currency risk

There are no significant exchange rate risks as substantially all financial assets and financial liabilities are denominated in Arab Emirates Dirhams, other G.C.C. currencies or US Dollars to which the Dirham is fixed.

25.7 Credit risk

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in financial loss to the Company.

Key areas where the Company is exposed to credit risk are:

- reinsurers' share of insurance liabilities;
- amounts due from reinsurers in respect of claims already paid;
- amounts due from insurance contract holders; and
- amounts due from insurance intermediaries;

The Company has adopted a policy of dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by Management annually.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract.

The Company maintains records of the payment history for significant contract holders with whom it conducts regular business. The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Company. Management information reported to the Company includes details of provisions for impairment on insurance receivables and subsequent write-offs. Exposures to individual policyholders and groups of policyholders are collected within the ongoing monitoring of the controls. Where there exists significant exposure to individual policyholders, or homogenous groups of policyholders, a financial analysis equivalent to that conducted for reinsurers is carried out by the Company.

Insurance receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of insurance receivable.

Notes to the financial statements
For the year ended 31 December 2016 (continued)

25. Financial instruments (continued)

25.7 Credit risk (continued)

At the end of the reporting period, the Company's maximum exposure to credit risk, from insurance receivables situated outside the U.A.E. were as follows:

	2016 AED	2015 AED
Europe	**2,160,977**	8,666,117
Other G.C.C. countries	**794,964**	2,374,614

The Company has no significant concentration of credit risk, with exposure spread over a large number of counterparties and customers. The Company defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

The carrying amount of financial assets recorded in the financial statements, which is net of impairment losses, represents the Company's maximum exposure to credit risk.

25.8 Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has built an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below summarises the maturity profile of the Company's financial instruments. The contractual maturities of the financial instruments have been determined on the basis of the remaining period at the reporting date to the contractual maturity date. The maturity profile is monitored by management to ensure adequate liquidity is maintained. The maturity profile of the financial assets and financial liabilities at the reporting date based on contractual repayment arrangements was as follows:

	Less than 30 days AED	31-90 days AED	91-180 days AED	181 - 365 days AED	Above 365 days AED	Total AED
31 December 2016						
Financial assets						
Available-for-sale securities	-	-	-	-	10,314,691	10,314,691
Held for trading investments	4,184,794	-	-	-	-	4,184,794
Statutory deposit	-	-	-	-	10,000,000	10,000,000

Financial liabilities						
Insurance and other payables	9,208,947	34,720,512	26,885,848	14,209,939	1,948,643	86,973,889

25.9 Interest risk

The Company's exposure to interest rate risk relates to its bank deposits. At 31 December 2016, bank deposits carried interest at the range of 1.5% to 3.45% per annum (2015: 0.8% to 3.25% per annum). There are no bank overdrafts as at 31 December 2016.

If interest rates had been 50 basis points higher/lower throughout the year and all other variables were held constant, the Company's profit for the year ended 31 December 2016 and equity as at 31 December 2016 would increase/decrease by approximately AED 221,783 (2015: AED 183,014). The Company's sensitivity to interest rates has not changed significantly from the prior year.

25.10 Equity price risk

25.10.1 Sensitivity analysis

At the end of the reporting period, if the equity prices are 10% higher/lower as per the assumptions mentioned below and all the other variables were held constant, the Company's:

- profit for the year would have decreased/increased by AED 418,479 (2015: AED 396,553).
- other comprehensive income and equity would have increased/decreased by AED 1,031,469 (2015: AED 3,081,658).

Notes to the financial statements
For the year ended 31 December 2016 (continued)

25. Financial instruments (continued)

25.10 Equity price risk (continued)

25.10.2 Method and assumptions for sensitivity analysis

- The sensitivity analysis has been done based on the exposure to equity price risk at the reporting date.
- At the end of the reporting period, if equity prices are 10% higher/lower on the market value uniformly for all equities while all other variables are held constant, the impact on profit or loss and equity has been shown above.
- A 10% change in equity prices has been used to give a realistic assessment as a plausible event.

26. Segment information

The Company is organised into two segments: Underwriting and investments. Underwriting segment incorporates all classes of general insurance including fire, marine, medical, motor, general accident and other classes of insurance.

Investments segment includes investments in U.A.E. marketable equity securities, term deposits with banks, investment properties, trading investments and other securities. These segments are the basis on which the Company reports its primary segment information to the Managing Director. Insurance premium represents the total income arising from insurance contracts. The Company does not conduct any business outside U.A.E. There are no transactions between the business segments.

Segmental information is presented below:

The following is an analysis of the Company's revenue classified by major underwriting departments:

	2016 **AED**	2015 AED
Motor	**48,021,952**	49,246,093
Marine and aviation	**6,795,752**	7,269,753

Notes to the financial statements
For the year ended 31 December 2016 (continued)

27. Dividend

At the Annual General Meeting held on 13 April 2016, the Shareholders approved a cash dividend of AED 5.5 million (5 fils per share) for 2015 (for 2014 AED 11 million – 10 fils per share). The Shareholders also approved Board of Directors' remuneration of AED 1.4 million for 2015 (2014: AED 1.3 million).

The Board of Directors' propose that a dividend of AED 10 fils per share amounting to AED 11 million be paid to shareholders in 2017. Further, the Board of Directors propose Board of Directors remuneration of AED 1.5 million for 2016. These are subject to approval by the shareholders at the Annual General Meeting and have not been included as a liability in these financial statements.

28. Changes in accounting policy

Effects of changes in accounting policies

As disclosed in note 3.3, Company has voluntarily changed its accounting policy for deferred commission income by deferring commission incurred over the terms of policies as premium is earned and has created provision relating to unallocated loss adjustment expenses. Comparative information for the year 31 December 2015 have not been adjusted to reflect the effect of the change in accounting policy as the amount was not material. Had the Company restated the prior year financial statements for the voluntary change of accounting policy, profit for the year 2015 and equity as at 31 December for 2015 would have decreased by AED 3.6 million and profit for the year 2016 and equity as at 31 December 2016 would have increased by AED 3.6 million respectively.

29. Reclassification

The following balances in the statement of financial position for the prior period have been reclassified to conform to the current period presentation.

	As previously reported at 31 December 2015 AED	Reclassification AED	As reclassified at 31 December 2015 AED
Reinsurance contract assets	165,568,560	(25,379,851)	140,188,709
Insurance and other receivables	181,264,606	12,050,576	193,315,182
Deferred acquisition cost	-	13,329,275	13,329,275

30. Approval of the financial statements

The financial statements were approved by the Board of Directors and authorized for issue on 8 February 2017.
